Petr Hýl

Frontend Developer with an AI Workflow

Olomouc, Czech Republic hylpetr@centrum.cz linkedin.com/in/petr-hýl-432324b7

Profile

Frontend developer who has been building and deploying websites, e-shops and PWAs for the web agency IMPnet as a freelancer since 2022 – around 150 projects so far. I develop with AI agents in Claude Code: I write custom skills, build multi-agent workflows and maintain a knowledge base the agents work from. A background in PR and customer support means I am comfortable working with clients in Czech, English and French.

AI in development

- Claude Code as my main development environment – getting oriented in unfamiliar code, implementing, reviewing the result and recording decisions.
- Custom skills: automated translation of localized content in a TinyMCE CMS (tested with jsdom), restyling a website from a Figma design, scroll-driven animations.
- Multi-agent Figma-to-components pipeline: an orchestrator with subagents, Code Connect as the source of design tokens.
- A knowledge base for agents (Obsidian “LLM wiki”) that agents read and update after every task.
- MCP integrations – Figma, browser, file system.

Skills

AI workflow
Claude Code, custom skills (SKILL.md), subagents and multi-agent workflows, MCP (Figma, browser), prompting and context for agents

Frontend
HTML5, CSS3, Less, JavaScript, UIkit, Chart.js, PWA (service worker, manifest), responsive design

Templates and deployment
Nette / Latte, e-mail templates, PDF templates, Git, GitLab (issues, merge requests, deploy), DNS, SSL, FTP, MySQL

Performance and quality
PageSpeed / Lighthouse, image and asset optimization, SEO basics, website localization (CZ, SK, EN, FR, PL)

Design and tools
Figma, Adobe XD, Photoshop, Inkscape, VS Code, Laragon, NPM

Also
Vue.js

Experience

7/2022 – present

Frontend Developer, freelance

IMPnet, s.r.o. (web agency)

Turning designs into templates, deploying websites and e-shops, maintaining and extending client projects.

- Around 150 websites, e-shops and real-estate portals, from a Figma / Adobe XD design to launch on the production server.
- PWAs: hand-written service worker, manifest and offline mode (app.lindabstrechy.cz, thermo-control.cz, mentem.cz).
- mentem.cz – user profile for a games portal with player statistics, Chart.js charts and family licences (about 240 hours of development).
- Performance: raised the mobile PageSpeed score of amrs.cz from 33 to 85.
- E-mail and PDF document templates (product sheets, orders, property cards).
- GitLab workflow – issues, merge requests, deploys; launching sites including DNS and SSL.

Earlier experience

2020 – 8/2023	**Customer Service Representative**	DHL Freight CZ, s.r.o.
2019 – 2019	**Customer Support Specialist (French)**	Kiwi.com
